

Delay to publication schedule due to COVID-19

Rethinking Waste was set to culminate in a 5-day event at G5A Mumbai, due to take place in April 2020. The outcomes of this gathering were to be consolidated into many chapters of the book: *Waste Work: The Art of Survival in Dharavi*, featuring contributions by participating artists and the project's core academic team, due to be released October/November 2020. COVID-19 forced cancellation of the G5A live event. Due to the role this played in the book, cancellation had direct knock on effects to the publishing schedule. Publication is now anticipated for June 2021, with the ISBN 9780993551178.
